Achievements

Why INDICATORS

Team specialized in research methodologies

Professional data collection team

Data quality control

Implementing the personal data security procedures (KVKK)

Expert analytics team

High coordination with the client and the implementing partners

Research

- Polls
- Questionnaire writing skills
- Sampling
- Data collection skills
- Data collection apps

Analytics

- Power BI
- SPSS
- Excel
- Info maps
- Statistical Testing
- Data management
- Prediction

Quality Control

- Data quality control
- M&E
- Needs assessment
- Impact analysis
- Statistical quality control
- Internal auditing
- System operating procedures

Data Analysis Programs

**Constitutional
Process**
in the Eyes of Syrians

Questionnaire writing toolbox

The data quality assurance that INDICATORS follow to maintain the data quality are as follow:

Accuracy

- Data are considered to be correct.
- The data measure what they are intended to measure.
- Minimizes error (e.g., recording or interviewer bias, transcription error, sampling error) to a point of being negligible.

Reliability

- By using the data reliability tests using IBM SPSS Statistics packages.

Completeness

- The interview has been completed.
- If not, delete the cases that do not provide useful information.

Timeliness

- Checking the timings, start and end of the interview and how many interviews conducted per enumerator a day.

Integrity

- Debriefing the enumerators to have their feedback about the conducted interviews.

Confidentiality

- Through the supervision of the Field Team Leaders to guarantee the enumerators do not keep or use any of the information related to the interviews.
- Deleting the uploaded interviews automatically by Kobo.
